SUMMARY

Computer Science undergraduate with hands-on, project-based experience across web development (HTML, CSS, JavaScript, basic Node.js/MongoDB), Python and C++ programming, AI-powered workflow automation (n8n, OpenAI, Vapi.ai), and API/database integration. Daily hands-on user of Claude AI and other AI tools for research, content, documentation, and coding support. Proficient in Microsoft Office, comfortable with basic social media content creation, and quick to pick up new platforms and tools. Detail-oriented, strong communicator, and reliable across technical and non-technical, remote and on-site environments.

TECHNICAL SKILLS

Web Development: HTML5, CSS3 (responsive/mobile-first design), JavaScript (ES6+); basic Node.js & MongoDB; building React skills; familiarity with/eagerness to learn Wix Studio, Webflow, Shopify (Liquid)

Programming & Data: Python, C++, SQL & database design/normalization, Data Structures & Algorithms, Object-Oriented Programming

AI & Automation: Claude AI, OpenAI API, ChatGPT, Vapi.ai (voice AI); workflow automation with n8n (hands-on), Make.com (self-taught), familiarity with Zapier concepts; webhooks, routers, filters, data mapping

Integrations & Tools: REST APIs, Google Calendar/Gmail/Sheets/Workspace, Git & GitHub, VS Code, Microsoft Office (Word, Excel, PowerPoint)

Other: Basic social media content creation & channel management, cross-browser testing & debugging, process documentation

Soft Skills: Problem-solving, clear communication, teamwork, adaptability, time management, initiative, fast learner

PROJECTS

Nova – AI Personal Assistant (HTML, CSS, JavaScript, Python, Node.js, MongoDB) – Built a responsive personal assistant integrating the Grok API and a live weather API; added a basic Node.js/MongoDB backend for data storage and retrieval via REST API.
github.com/Komal-Sharafat-518/NOVA

AI Receptionist for Dental Clinics (n8n, OpenAI API, Vapi.ai, Google Calendar & Gmail) – Designed an end-to-end automated workflow: voice call handling, patient info collection, real-time appointment booking, and automated email confirmations.

Mess Management System (HTML, CSS, JavaScript) – Responsive web app to manage daily mess operations, menus, and member records.

Database-Driven Management Systems (SQL) – Designed a Student Management Database and an Online Shopping Database with normalized schemas and stored procedures.

Hostel Management System (C++) – Console-based application for student records, room allocation, and fee tracking.

AlgoEscape (C++, Data Structures & Algorithms) – Console-based puzzle game applying core DSA concepts.

To-Do List Application (Python) – Task manager with add, update, and delete functionality.

Content Creator – Personal YouTube Channel – Independently plan, create, and publish content; practical experience in digital content creation and audience engagement.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2024 – Present (Expected 2028)

University of Engineering and Technology (UET), Lahore | CGPA: 3.50/4.00

Relevant coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Web Development, Software Engineering, Computer Networks

CERTIFICATIONS & LANGUAGES

Python Basics Certificate | English (Professional Working Proficiency) | Urdu (Native)
